### SKATING THEIR WAY INTO STEM

Studies on education have shown that when students are engaged in a fun and interactive lesson, retention and comprehension soars. Last week, grades 6 through 8 joined at *United Skates of America* for a STEM lesson titled, "Heart, Health and Fitness!" Lead by a STEM teacher, our students learned about nutrition, exercise, and how skating can be a great way to get in shape! They even had a chance to get up and skate around the rink to put their knowledge to the test.

### Looking Ahead:
